POLICY: CLINICAL LABORATORY SCIENCES LIMITED SPACE AT CLINICAL SITES

I. Purpose

This policy outlines the space limitations for clinical rotations.

II. Scope

This policy applies to the Clinical Laboratory Sciences program in the Graduate School of Biomedical Sciences of New York Medical College.

III. Definitions

IV. Policy

Limited Space at Clinical Sites

Each clinical site affiliated with the MLS program will train one student in each clinical laboratory section at each clinical site during the clinical practicum. Should the number of students ready for clinical placement at any given time exceed the number of spaces available, the students may be placed on a waiting list, if necessary, and will be assigned the next available site based on the remaining needs for their clinical practicum completion. While on the waiting list, simulations and coursework appropriate for the student's scheduled Clinical Practicum rotation will be assigned on MediaLab, a cloud-based learning platform until placement is available. MediaLab simulations and coursework do not substitute for Clinical hours required for NYS licensing.
